An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following election of species is required:

Election

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. The species of the method of claims 1, 2, 4, and 6.
- II. The species of the method of claims 3 and 5

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP§809.02(a).

Art Unit: 1723

The claims are deemed to correspond to the species listed above in the following manner: For the election I, claims 1, 2, 4, and 6 are directed to species I and claims 3 and 5 are directed to species II.

The following claim(s) are generic: No claim is considered to be generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The improvement listed in the last five lines of claims 1 would not have been obvious from the improvement listed in the last four lines of claim 3.

During a telephone conversation with Donald Stout on November 6, 2006 an election was made to prosecute the species of claims 1, 2, 4, and 6. Claims 3 and 5 have been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claims 3 and 5, drawn to a non-elected species, have been cancelled.

Authorization for this examiner's amendment was given in a telephone interview with Donald Stout on November 6, 2006.

Prior to the first line of the first page of the specification, the following has been inserted:

- - Reference to Related Applications

This application is a 371 of PCT/FR03/02327 filed July 23, 2003 - - .

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1723

The following is an examiner's statement of reasons for allowance: Couenne (U.S. Patent No. 5,902,486) is considered to be the closest art because it discloses a similar method. The case has been allowed because the recited combination of steps would not have been obvious from Couenne (U.S. Patent No. 5,902,486).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to E. Therkorn at telephone number (571) 272-1149. The official fax number is 571-273-8300.
